and Environment

January 31, 2005

Mr. Joe Legare  
Director, Project Management Division  
U.S. Department of Energy, Rocky Flats Project Office  
10808 Highway 93, Unit A  
Golden, CO 80403-8200

**RE: Reconnaissance Level Characterization Report (RLCR) for Building 906 – Concurrence**

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received your letter dated January 27, 2005 and reviewed the RLCR for Building 906, Revision 0 dated January 21, 2005. Based on the information contained in the RLCR, we are hereby concurring with the determination that B906 is a Type 1 Facility.

As previously discussed in our RCRA Unit 14 closure approval letter dated January 24, 2005, special care should be given to the potential for soil contamination underlying B906 due to the potential utilization of possible contaminated soil from other Rocky Flats sites. As such, limited field method screening for radionuclides, metals and volatiles should be performed to properly determine the potential of possible soil contamination underlying B906. However, information indicating that the site was cleared prior to construction of the building in the mid 1990's should be sufficient. Resolution of this issue should be accomplished utilizing the consultative process and results provided in the Closeout Report.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328, or Harlen Ainscough at (303) 692-3337.

Sincerely,

Steven H. Gunderson  
RFCA Project Coordinator
